

Vantiv Icon Fonts

How to install and specify icon classes

Installing Vantiv Icon Font

1. Install the Vantiv Icon Font variations into your web project. The files include:
 - a. Vantiv-Icons.eot
 - b. Vantiv-Icons.svg
 - c. Vantiv-Icons.ttf
 - d. Vantiv-Icons.woff
2. Add the vantiv-icons.css file into your project and modify the paths to your font files at the top of the page
3. Wire it up by linking it in your header of your html document. Here is an example:

```
<!doctype html>
<html>
<head>
  <link rel="stylesheet" href="vantiv-icons.css">
</head>
<body>
  <span class="icon vantiv-pencil icon-yellow icon-8x"></span>
</body>
</html>
```

Vantiv Icon Font Explained

Use the icon class to set the Vantiv icon font family

This is an example of selecting the icon you want to see on the screen. See the Vantiv Icon Font Guide PDF for a complete list

This is an example of changing the icon color. Out of the box options include the Vantiv brand colors:

- icon-yellow
- icon-purple
- icon-gray-dark
- icon-gray-med
- icon-gray-light

This is an example of setting the size. Out of the box options include icon-1x through icon-20x.

At the end of the day this is all done through common CSS syntax. You can create your own classes or modify things as needed to support your project.
